

WTBA Learning Journey: A Level Spanish

Intent : This Scheme of Work aims to quickly build on students' prior knowledge of languages, to reinforce their knowledge and recognition of key grammar and introduce them to more in-depth study of Hispanic culture. Through classwork, guided work and independent study, students will develop their ability to adapt and manipulate language in order to successfully communicate and also to cope with unexpected/new vocabulary. Students will start to research different aspects of culture and ways of life of Spanish-speaking countries in preparation for their Individual Research Project (IRP).
